## I. INTRODUCTION

### A. RISK FACTORS

#### **Standard Risk Factors:**

- I. Mutual Fund Investments are subject to market risks, read all scheme related documents carefully.
- II. Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved
- III. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- IV. As the price / value / interest rates of the securities in which the Scheme/s invests fluctuate, the value of your investment in the Scheme/s may go up or down.
- V. The past performance of the Sponsors/AMC/Mutual Fund does not guarantee future performance of the Scheme/s.
- VI. The Name of the scheme(s) do not in any manner indicate either the quality of the Scheme, its future prospects or returns.
- VII. Canara Bank and ORIX Corporation Europe N.V (formerly Robeco Groep N. V.), being the Sponsors, are not responsible or liable for any loss resulting from the operation of the Scheme/s beyond the initial contribution of Rs. 10 Lacs made by it towards setting up Canara Robeco Mutual Fund.
- VIII. The present scheme is not a guaranteed or assured return scheme.

#### **Scheme specific Risk Factors**

- I. **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rate rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- II. **Credit Risk:** In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of the security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme/s has invested in Government securities, there is no credit risk to that extent.
- III. **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- IV. **Liquidity Risk:** This refers to the ease with which a security can be sold at or near to its valuation or yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer.
- V. **Basis Risk:** The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.
- VI. **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- VII. **Liquidity Risk on account of unlisted securities:** The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.
- VIII. **Settlement Risk:** Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Different types of securities in which the Scheme/s would invest as given in the offer document carry different levels and types of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further, even among corporate bonds, bonds which are AA rated are comparatively riskier than bonds which are AAA rated.

IX. **Securitized Debt:** The Scheme (s) in accordance with the asset allocation may invest in domestic securitized debt such as asset backed securities (ABS) or mortgage backed securities (MBS). ABS means securitized debts wherein the underlying assets are receivables arising from personal loans, automobile loans, etc. MBS means securitized debts wherein the underlying assets are receivables arising from loans backed by mortgage of properties which can be residential or commercial in nature. ABS / MBS instruments reflect the undivided interest in the underlying of assets and do not represent the obligation of the issuer of ABS / MBS or the originator of the underlying receivables. The ABS / MBS holders have a limited recourse to the extent of credit enhancement provided. ABS / MBS holders will suffer credit losses in the event of the delinquencies and credit losses in the underlying pool exceed the credit enhancement provided. As compared to the normal corporate or sovereign debt, ABS / MBS are normally exposed to a higher level of reinvestment risk. The fund intends to invest only in securitized instruments rated at least AA (SO) or its equivalent by a recognized credit rating agency. The securitized debt assets and the underlying asset classes like Housing Loans, Auto Loans and Corporate loans have the following risk factors:

**A. Risk associated with Mortgage Backed Securities (MBS) - Housing Loans**

**Prepayment Risk:** The Fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors.

**Credit Risk:** Delinquencies may happen which would reduce the principal amount. Typically, MBS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility, then the monthly payouts to the Fund would reduce. Historically, it has been observed that housing loans have lower default rates as compared to other forms of credit.

**Liquidity Risk:** Historically the secondary market volume for securitized papers has been limited. This could limit the ability of the Fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

**Conversion Risk:** Conversion of loans from fixed rates to floating rate loans and vice versa could lead to a change in the expected cash flows from the loans.

**B. Risk associated with Asset Backed Securities (ABS)-Auto loans**

**Prepayment Risk:** The Fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors. Prepayment in auto loans is lower than housing loans as the shorter tenor of auto loans makes it economically unattractive to prepay after considering the prepayment charges.

**Credit Risk:** Delinquencies may happen which would reduce the principal amount. Typically, ABS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility, then the monthly payouts to the Fund would reduce. Typically, auto loans carry higher risk than MBS as the value retention of the underlying asset is higher in MBS as compared to the underlying asset of ABS.

**Liquidity Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the Fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

**C. Risk associated with Asset Backed Securities (ABS) - Corporate loans**

**Credit Risk:** The Fund has an exposure to the Borrower/Borrowers and servicing of the instrument depends on the credit risk of the borrower. The value of the instrument would fluctuate depending upon the changes in the perceived level of credit risk as well as any actual default.

**Prepayment Risk:** The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the Fund.

**Limited Liquidity and Price Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the Fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

X. **Other Risks:**

Zero coupon or Deep Discount Bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specific date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face value. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the issuer. The market rates of zero coupon securities are generally more volatile than the market price of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and creditworthiness.

In the event of substantial investment by the Sponsor/s, or its associates in the Scheme(s), any redemption by these entities may have an impact on the performance of the Scheme(s).

Canara Robeco Mutual Fund will not be responsible for any loss of tax benefits in the event of winding up of the Scheme(s) or for any amendments in the tax laws that may affect the tax benefits available under the Scheme(s). The tax benefits are based on the present laws and rules in force.

XI. **Risk associated with investment in Money Market Instruments**

Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's inability to meet interest and principal payments.

Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, the general level of market liquidity and market perception of creditworthiness of the issuer of such instruments.

The NAV of the Units, to the extent that the corpus of the Scheme is invested in money market instruments, will be affected by changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

**B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME**

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme/Plan shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

**C. SPECIAL CONSIDERATIONS**

- Prospective investors should study this Scheme Information Document and Statement of Additional Information carefully in its entirety and should not construe the contents hereof as advice relating to legal, taxation, financial, investment or any other matters and are advised to consult their legal, tax, financial and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, before making a decision to invest / redeem / hold Units.
- Neither this Scheme Information Document, Statement of Additional Information nor the Units have been registered in any jurisdiction. The distribution of this Scheme Information Document or Statement of Additional Information in certain jurisdictions may be restricted or totally prohibited due to registration requirements and accordingly, persons who come into possession of this Scheme Information Document or Statement of Additional Information are required to inform themselves about and to observe any such restrictions and / or legal compliance requirements.

- The AMC, Trustee or the Mutual Fund have not authorized any person to issue any advertisement or to give any information or to make any representations, either oral or written, other than that contained in this Scheme Information Document or the Statement of Additional Information or as provided by the AMC in connection with this offering. Prospective Investors are advised not to rely upon any information or representation not incorporated in the Scheme Information Document or Statement of Additional Information or as provided by the AMC as having been authorized by the Mutual Fund, the AMC or the Trustee.
- The liquidity of the Scheme's investments inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemptions or of a restructuring of the Scheme's investment portfolio, there may be delays in the redemption of units. Please refer to the section on "Right to limit repurchases".
- The value of the Scheme/s investments may be affected by factors affecting capital markets generally, such as price and volume volatility in the stock markets, interest rates, currency exchange rates, foreign investments, changes in government policy, political, economic or other developments and closure of the stock exchanges. The NAV of the Scheme will be sensitive to changes in Interest /Bank / Prime Lending Rates. In case of investment in Money Market Instruments and in Central / State Govt. Securities by the Scheme, an increase in the Interest / Bank / Prime Lending Rates will impact the market value of existing investments leading to decrease in the Scheme's NAV.
- Debt securities are subject to the risk of an issuer's inability to meet principal and interest payments on the obligations (Credit Risk). Debt securities may also be subject to price volatility due to such factors as interest sensitivity, market perception or creditworthiness of the issuer and general market liquidity (Market Risk). While it is the intention of the Investment Manager to invest primarily in highly rated debt securities, the Scheme may from time to time invest in higher yielding, lower rated securities but not below investment grade and also in un-rated securities subject to provisions and restrictions laid down by SEBI, which would enhance the degree of risk. Changes in Government Policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme. The NAV of the scheme may be affected by the changes in the general market conditions, factors and forces affecting capital market in particular, level of interest rates, various market related factors, settlement periods and transfer procedures. If a Unit Holder invests in the schemes and acquire a substantial portion of the scheme units. The repurchase of units by the Unit Holder may have an adverse impact on the units of the schemes, because the timing of such repurchase may impact the ability of other Unit holders to repurchase their units.
- The tax benefits described in this SID are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor is advised to consult his/her own professional tax advisor.
- The NAV of the scheme may be affected by the changes in the general market conditions, factors and forces affecting capital market in particular, level of interest rates, various market related factors, settlement periods and transfer procedures.
- If a Unit holder invests in the schemes and acquire a substantial portion of the scheme units. The repurchase of units by the Unit Holder may have an adverse impact on the units of the schemes, because the timing of such repurchase may impact the ability of other Unit holders to repurchase their units.

### D. WHERE WILL THE SCHEME INVEST?

Subject to the Regulations and the circular dated 19th Jan, 2009, the corpus of the Scheme (s) may be invested in all or any one of (but not exclusively) the following securities in accordance with the asset allocation pattern of the scheme:

**Debt Instruments** - include Govt. of India securities (zero coupon or coupon bearing Bonds), State Govt. Bonds, Bonds issued by local Govt, Govt. Agencies and other statutory bodies (with or without Govt. Guarantee), Bonds of Public Sector Undertakings, Debentures issued by public, private sector undertakings, Financial Institutions with or without ratings, Securitised Debt, Usance Bills (Bills of Exchange drawn on a term governed by the usage in trade or between the companies involved) and other Domestic Instruments either listed or unlisted.

**Money Market Instruments** - include Commercial Papers, Commercial Bills, Treasury Bills, Government Securities having an un-expired maturity up to one year, Call or Notice Money, Certificate of Deposit, Usance Bills, Tri-party Repo, Repos & Reverse Repos in Government Securities/Treasury Bills, Bills re-discounting, MIBOR Instruments, alternative investment for the call money market as may be provided by the RBI to meet the liquidity requirements and any other Money market instruments specified by SEBI/RBI from time to time.

**Securitized Debt** - Securitised Debt is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. Asset Securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitisation involves sale of specific receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments (promissory notes, participation certificates or other debt instruments) also referred to as “Securitized Debt” to the investors evidencing the beneficial ownership of the investors in the receivables.

Investment in “Securitized Debt” includes investment in Asset Backed Receivables and Future Flow Receivables. Such Securitized Debts are asset classes like, personal vehicle receivables, commercial vehicle receivables, mortgage backed receivables i.e. housing finance receivables, lease receivables and corporate/consumer loan receivables.

The securities mentioned above could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of any maturity. The securities may be acquired through initial public offerings (IPOs), secondary market operations, private placement or rights offers. All investments in securities whether privately placed or otherwise will be in line with SEBI guidelines as applicable and the investment objectives and policies of the Scheme. Investment in unrated securities will be in accordance with SEBI guidelines as applicable.

The AMC may from time to time for a short-term period under exceptional circumstances on defensive consideration modify / alter the investment pattern / asset allocation the intent being to protect the Net Asset Value of the Scheme & the interests of Unit Holders without seeking consent of the Unit Holders.

**Any Other:** Any other instruments as may be permitted by RBI/SEBI/such other regulatory authority from time to time.

**Investment in other Schemes:** The investment by the Scheme(s) in other Mutual Fund Schemes will be in accordance with Regulation 44(1) read with Clause 4 of the VII Schedule to the SEBI (Mutual Funds) Regulations, 1996 according to which:

- The Scheme/s may invest in another scheme under the same asset management company or in any other mutual fund without charging any fees, provided the aggregate inter scheme investments made by all the Schemes under the same management or in schemes under the management of any other AMC shall not exceed 5% of NAV of the mutual fund.
- The Scheme/s shall not make any investment in any fund of fund scheme.

#### E. WHAT ARE THE INVESTMENT STRATEGIES?

The funds will be invested in Debt & Money Market Instruments (with residual maturity not greater than 1 business day,) offering reasonable liquidity and returns, with risk perceived by the Investment Manager. Investments under the Scheme would be made predominantly in TREPS (Tri party Repo Dealing and Settlement), overnight reverse repos and fixed income securities/instruments with overnight maturity. The portfolio will be constructed and managed to generate returns to match the investment objective and to maintain adequate liquidity to accommodate funds movement.

As per the guidelines of RBI, Mutual Funds have currently ceased to access the call money market. The Schemes therefore proposes to avail facility of reverse repos / TREPS (Tri party Repo Dealing and Settlement) to temporarily invest short term liquidity and to meet redemption / repurchase requirements.

The investments may be made in primary as well as secondary markets. As far as possible, the portfolio will be adequately diversified to reduce the risk of underperformance, arising out of unexpected security-specific factors. Investments will be made in State / Central Government Securities, Treasury Bills: i) supported by the ability to borrow from the Treasury ii) supported by sovereign guarantee or of the State Government iii) supported by the Government of India / State Government in any other manner.

Instruments	Credit risk
Call Money Lending	Low
MIBOR	Low
Central Govt	Sovereign
1y Tbill	Sovereign
10y G Sec	Sovereign
3m PSU Bank CD	Low
3m NBFC CP	Low to Medium
10y G Sec	Low

The Scheme will seek to underwrite issuance of Government Securities if any, to the extent permitted by SEBI / RBI, subject to the prevailing rules and regulations specified in this respect. The Scheme may also participate in their auction from time to time.

There can be no assurance that the investment objective of the Scheme will be realized. It is, however, emphasized that, there is no risk of default of payment of either principal or interest amount in respect of investments made in Government Securities, Treasury Bills under this Scheme.

### **Risk Control Mechanism:**

Since investing requires disciplined risk management, in order to protect the interests of investors, the AMC would incorporate adequate safeguards for controlling risks in the portfolio. As a prudent measure, the AMC has broad internal investment norms and investments made through the scheme would be in accordance with the investment objectives of the schemes and provisions of SEBI Regulations. Where required, scheme specific guidelines are also in place.

### **Debt Securities**

Concentration of risk is mitigated by defining issuer limits. Rigorous in-depth credit evaluation of the issuers will be conducted by the investment team before making investments. As part of credit evaluation, a study on the operating environment, past track record as well as future prospects of the issuer, short as well as long term financial health of the issuer will be carried out. The AMC will be guided by the ratings of accredited agencies such as CRISIL, CARE, ICRA etc. as well as the internal norms for credit exposure

### **Portfolio Turnover:**

The Scheme is an open-ended debt scheme investing in overnight securities. It is expected that there would be a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

### **Debt and Money Market in India**

The Indian debt market is today one of the largest in Asia and includes securities issued by the Government (Central & State Governments), public sector undertakings, other government bodies, financial institutions, banks and corporates. Government and public sector enterprises are the predominant borrowers in the markets. The major players in the Indian debt markets today are banks, financial institutions, mutual funds, insurance companies, primary dealers, trusts, pension funds and corporates. The Indian debt market is the largest segment of the Indian financial markets. The debt market comprises broadly two segments, viz. Government Securities market or G-Sec market and corporate debt market. The latter is further classified as market for PSU bonds and private sector bonds.

The Government Securities (G-Secs) is the oldest and the largest component (60% share in market cap) of the Indian debt market in terms of market capitalization, outstanding securities and trading volumes. The G-Secs market plays a vital role in the Indian economy as it provides the benchmark for determining the level of interest rates in the country through the yields on the Government Securities which are referred to as the risk-free rate of return in any economy. Over the years, there have been new products introduced by the RBI like zero coupon bonds, floating rate bonds, inflation indexed bonds, etc.

The corporate bond market, in the sense of private corporate sector raising debt through public issuance in capital market, is only an insignificant part of the Indian Debt Market. A large part of the issuance in the non-Government debt market is currently on private placement basis.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates. In money market, activity levels of the Government and nongovernment debt vary from time to time. Instruments that comprise a major portion of money market activity include but not limited to:

- Overnight Call
- Tri- Party Repo
- Repo/Reverse Repo Agreement
- Treasury Bills
- Government securities with a residual maturity of < 1 year.
- Commercial Paper
- Certificate of Deposit

Apart from these, there are some other options available for short tenure investments that include MIBOR linked debentures with periodic exit options and other such instruments. Though not strictly classified as Money Market Instruments, PSU / DFI / Corporate paper with a residual maturity of < 1 year, are actively traded and offer a viable investment option.

The market has evolved in past 2-3 years in terms of risk premia attached to different class of issuers. Bank CDs have clearly emerged as popular asset class with increased acceptability in secondary market. PSU banks trade the tightest on the back of comfort from majority government holding. Highly rated manufacturing companies also command premium on account of limited supply. However, there has been increased activity in papers issued by private/foreign banks/NBFCs/companies in high-growth sector due to higher yields offered by them. Even though companies across these sectors might have been rated on a same scale, the difference in the yield on the papers for similar maturities reflects the perception of their respective credit profiles.

The following table gives approximate yields prevailing as on 3rd July 2019 on some of the instruments: -

<b>Instrument</b>	<b>Current Yield Range</b>
TREPS ( overnight segment)	4.00%-5.75%
Repo ( overnight segment)	1.75%-5.95%
3m Tbill	5.95%
1y Tbill	6.12%
10y G Sec	6.83%
3m PSU Bank CD	6.50%
3m NBFC CP	7.20%
3m Manufacturing Co. CP	6.80%
1y PSU Bank CD	7.28%
1y NBFC CP	7.95%
1y Manufacturing Co. CP(PSU)	7.35%
5y AAA Institutional Bond (PSU Bond)	7.66%
10y AAA Institutional Bond (PSU Bond)	7.83%

These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro-economic conditions and RBI policy. The price and yield on various debt instruments fluctuate from time to time depending upon the macro economic situation, inflation rate, overall liquidity position, foreign exchange scenario etc. Also, the price and yield vary according to maturity profile, credit risk etc.

**A. COMPUTATION OF NAV**

The computation of NAV, valuation of securities / assets, accounting policies and standards would be in conformity with the SEBI (Mutual Funds) Regulations, 1996 and guidelines issued from time to time. The NAV per unit shall be calculated as follows:

$$\text{NAV (Rs.)} = \frac{(\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provisions})}{(\text{No. of Units outstanding under the Scheme})}$$

The price arrived shall be rounded off up to four decimals.

**An Illustration:**

Assume that the Market or Fair Value of Scheme's investments is Rs. 1,00,00,000; Current asset of the scheme is Rs. 25,00,000; Current Liabilities and Provisions is Rs. 15,00,000 and the No. of Units outstanding under the scheme are 5,00,000.

Thus, the NAV will be calculated as:

$$\text{NAV} = \frac{1,00,00,000 + 25,00,000 - 15,00,000}{5,00,000}$$

Therefore, the NAV of the scheme is Rs. 22.0000

**B. COMPUTATION OF SALE PRICE**

Since the fund do not charge any Entry Load, the Purchase price or "Sale Price" is same as NAV of the fund disclosed on daily basis. Therefore, entry load, if any shall be charged as a percentage of Net Assets Value (NAV) for calculating Sale Price i.e. applicable Entry Load (if any) as a percentage of NAV will be added to NAV to calculate "Sale Price". In other words, the following formulae shall be used:

$$\text{SALE PRICE} = \text{Applicable NAV} \times (1 + \text{Entry Load, if any})$$

**An Illustration:**

An investor invests Rs. 20,000/- and the current NAV is Rs.20/-. The entry load levied by the scheme is Nil i.e.0%.

Therefore, Sale price at which the investor invests = Rs.20.00 \* (1 + 0%) = Rs.20.00.

**C. COMPUTATION OF REPURCHASE PRICE**

For calculating the Repurchase Price, exit load charged to the scheme is subtracted i.e. applicable Exit Loads as a percentage of NAV will be subtracted from NAV to calculate Repurchase Price. The formula for calculation of Repurchase Price would be:

$$\text{REPURCHASE PRICE} = \text{Applicable NAV} \times (1 - \text{Exit Load, if any})$$

**An Illustration:**

An investor invests Rs. 20,000/- and the current NAV is Rs.20/-. The exit load levied by the scheme is NIL.

Therefore, the Repurchase Price will be = Rs.20.00 \* (1 - 0.0%) = Rs.20.00.

Notes:

1. It is assumed in the above illustration that the Investor redeems his investments within the applicable exit load period. No exit load will be levied after the completion of period of applicable exit load.

Different Schemes may have different exit load structures. Investors are requested to refer the Scheme documents / AMC website to know the latest exit load structures

Thus, there shall be no internal sub-limits within the expense ratio for expense heads mentioned under Regulation 52 (2) and (4) respectively. However, as per SEBI circular dated 2nd February, 2018 incases of all schemes, wherein exit load is not levied / not applicable, the AMCs will not be eligible to charge the above mentioned additional expenses for such schemes.

The purpose of the above table is to assist the Investor in understanding the various costs and expenses that an Investor in the Scheme will bear directly or indirectly. The figures in the table above are estimates. The actual expenses that can be charged to the Scheme will be subject to limits prescribed from time to time under the SEBI (MF) Regulations.

#As per the Regulation 52, the investment management fee and total annual scheme recurring expenses chargeable to the Scheme are as under:

- (i) On the first Rs. 500 crore of the daily net assets - 2.00%;
  - (ii) On the next Rs. 250 crore of the daily net assets - 1.75%;
  - (iii) On the next Rs. 1,250 crore of the daily net assets - 1.50%;
  - (iv) On the next Rs. 3,000 crore of the daily net assets – 1.35%;
  - (v) On the next Rs. 5,000 crore of the daily net assets – 1.25%;
  - (vi) On the next Rs. 40,000 crores of the daily net assets - Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof.
  - (vii) On the balance of the assets - 0.80%;
- (a) **Additional Expenses under Regulation 52 (6A):** brokerage and transaction costs which are incurred for the purpose of execution of trade and is included in the cost of investment, not exceeding 0.12 per cent in case of cash market transactions;
- In accordance with SEBI circular no. CIR/IMD/DF/24/2012 dated November 19, 2012, any payment towards brokerage and transaction cost, over and above the said 0.12% for cash market transactions, may be charged to the Scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52 (6) of the SEBI (MF) Regulations, 1996.
- (b) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by SEBI from time to time are at least -
- (i) 30 per cent of gross new inflows in the scheme, or;
  - (ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher

Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub- clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis;

The said additional expenses on account of inflows from beyond top 30 cities so charged shall be clawed back in the respective schemes, in case the said inflow is redeemed within a period of 1 year from the date of investment. The expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from such cities.

As per SEBI circular dated 22nd Oct, 2018 additional TER can be charged based on inflows only from retail investors from B 30 cities. It will be based on inflows from retail investors (inflows of amount up to Rs. 2, 00,000/- per transaction, by individual investors shall be considered as inflows from "retail investor") from B 30 cities, keeping all other conditions of SEBI Circular(s) on charging of additional TER of 30 bps unchanged. Thus, inflows from corporates and institutions from B 30 cities henceforth will not be considered for computing the inflows from B 30 cities for the purpose of additional TER of 30 basis points.

The additional commission for B 30 cities shall be paid as trail only.

**An illustration:**

Assuming, an investor has invested Rs.10, 000/- in the scheme having total expense ratio of 2.00%. The scheme generated a CAGR return of 10% over one year. Therefore,

Investment Amount (Rs.) (A) = 10,000

Scheme Return (1Year) in CAGR (%) (B) = 10%

Return in One Year (Rs.) (C= (A)\*(1+B)) = 1,000

Total Expense Ratio (%) (D) = 2.00%

Impact of Total Expense Ratio (Rs.) (E=A\*D) = 200

Total Return to the investor (Rs.) (F=C-E) = 800

As mentioned in the illustration above, the schemes return to the investor is impacted by 2.00% due to the expense charged.

Please note that the above is an approximate illustration of the impact of expense ratio on the returns, where the Gross NAV has been simply reduced to the extent of the expenses. In reality, the actual impact would vary depending on the path of returns over the period of consideration. Expenses will be charged on daily net assets. These estimates have been made in good faith as per the information available to the Investment Manager based on past experience, but the total expenses shall not exceed the limits permitted by SEBI. Types of expenses charged shall be as per the SEBI (MF) Regulations. The purpose of the above illustration is to assist the investor in understanding the various costs and expenses that an investor in the scheme will bear directly or indirectly.

**Goods and Service Tax (GST)**

GST shall be charged as follows:

- GST on investment and advisory fees shall be charged to the Scheme in addition to the maximum limit on TER as prescribed in Regulation 52 (6) of the SEBI (MF) Regulations.
- GST on other than investment and advisory fees, if any, shall be borne by the Scheme within the maximum limit on TER as prescribed in Regulation 52 (6) of the SEBI (MF) Regulations.
- GST on brokerage and transaction cost paid for execution of trade, if any, shall be within the limit prescribed under Regulation 52 of the SEBI (MF) Regulations.

Provided that any increase or decrease in TER in a mutual fund scheme due to change in AUM and any decrease in TER in a mutual fund scheme due to various other regulatory requirements would not require issuance of any prior notice to the investors.

Further, any change in the base TER (i.e. TER excluding additional expenses provided in Regulation 52 (6A) (b) and 52 (6A) (c) of SEBI (Mutual Funds) Regulations, 1996) and Goods & Services Tax on investment and advisory fees in comparison to previous base TER charged to the Scheme/Plan shall be communicated to investors of the Scheme/Plan through notice via email or SMS and will be uploaded on the website ([www.canararobeco.com](http://www.canararobeco.com)) at least three working days prior to effecting such change.

Provided that any decrease in TER in a mutual fund scheme due to various regulatory requirements, would not require issuance of any prior notice to the investors

**NOTE:**
