\*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

# Essence of Intrinsic Value Investing

"In general terms, intrinsic value is understood to be that value which is justified by the facts: the assets, the earnings, dividends, definitive prospects" - Benjamin Graham

'INTRINSIC VALUE' is a true value of an asset. It is the maximum price one is ready to pay to hold the asset forever!

# Intrinsic Value Investing-The Concept

- Intrinsic Value Investing is a broader philosophy which involves buying companies at a price lower than their intrinsic value
- Keeping a margin of safety
- Taking advantage of market inefficiencies

# *"All sensible investing is Value Investing" - Charlie Munger*

 Keeping margin of safety reduces downside risk

# Intrinsic Value Investing- The Concept

#### An Illustration:

**CANARA** ROBECO

In general, a company with an Intrinsic value of Rs.1.00 is considered to have a good buffer when you buy it at a Price of Rs.0.50. This gives a margin of safety equivalent to 50%.

Market Price	Margin of Safety	Valuation
Stock trades @ Rs.0.50	Rs.1.00 - Rs.0.50 Rs.1.00 X 100% = <b>50%</b>	Undervalued [High Margin of Safety]
Stock trades @ Rs.0.90	Rs.1.00 – Rs.0.90 Rs.1.00 X 100% = <b>10%</b>	Undervalued [Low Margin of Safety]
Stock trades @ Rs.1.00	Rs.1.00 - Rs.1.00 Rs.1.00 X 100% = <b>0%</b>	Fair value
Stock trades @ Rs.1.50	Rs.1.00 – Rs.1.50 Rs.1.00 X 100% = - <b>50%</b>	Overvalued

**Mutual Fund** 

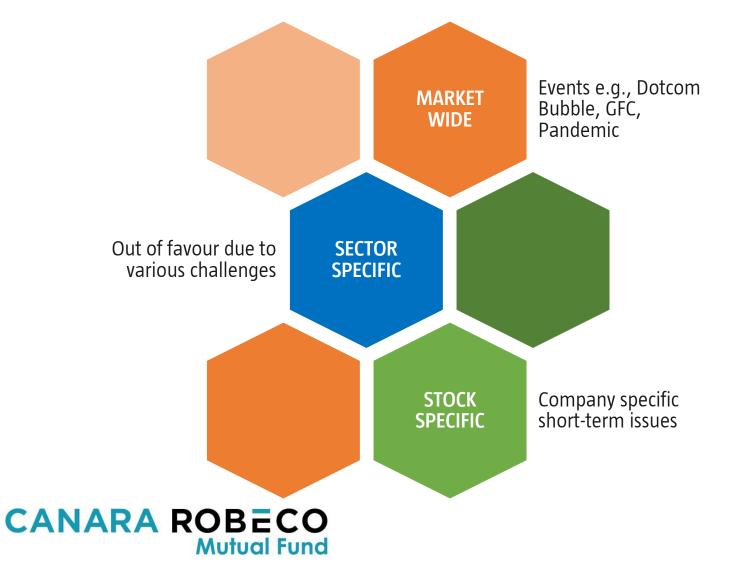

A margin of safety is achieved when securities are purchased at prices sufficiently below underlying value to allow for human error, bad luck, or extreme volatility in a complex, unpredictable and rapidly changing world" -Seth Klarman

#### ✓ HIGHER THE MARGIN OF SAFETY; LOWER THE RISK

### Portfolio Structure

CANARA ROBECO Mutual Fund

The above is only indicative in nature. There is no assurance or guarantee that the investment objective of the scheme will be achieved. Mutual fund investments are subject to market risks, please read scheme related documents carefully before investing.

### **Canara Robeco Investment process**

The above is only for general understanding purposes, and should not be construed as CRAMC investment policy, portfolio construction or the performance of the scheme

### **Stringent Risk management is the Key**

Risk control process to manage risks through various tools such as stock limit and sector limit; to ensure that the portfolio liquidity is maintained without compromising on the return

We believe that optimal diversification would help achieve the desired level of consistency in return

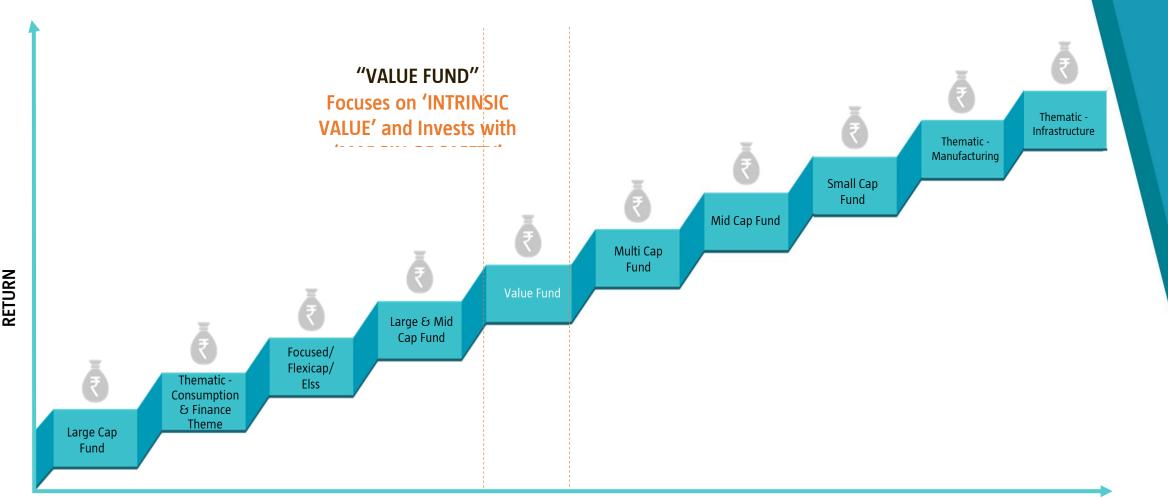

Our aim is to identify securities, which offer favourable risk adjusted returns

With the aim of controlling risks, the investment team will carry out rigorous in-depth analysis of the securities proposed to be invested in – ongoing monitoring

**FUND POSITIONING** 

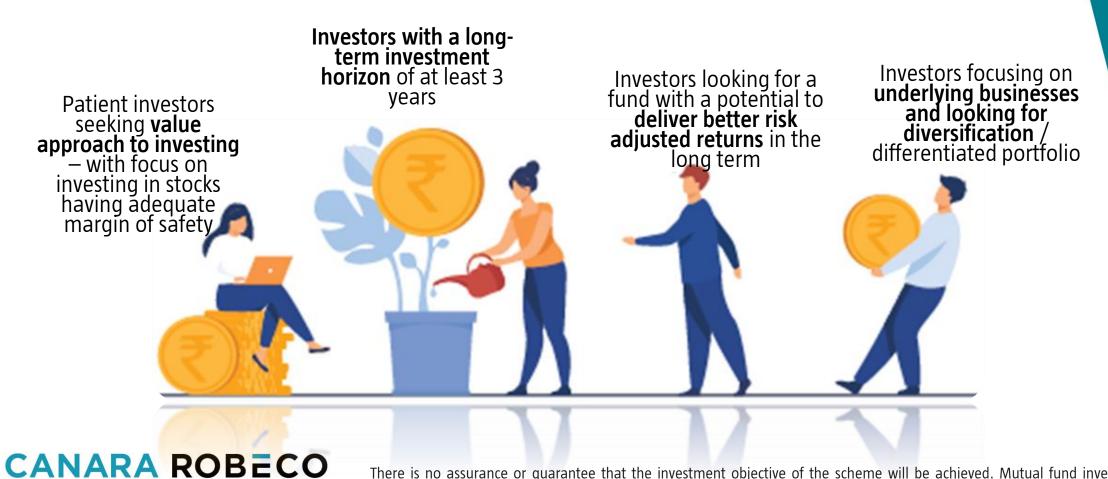

#### VOLATILITY

CANARA ROBECO Note: The fund positioning broadly reflects the category average rolling returns & standard deviation based on 3 year rolling returns taking past 3 years as a time Mutual Fund horizon on a monthly rolling basis. The same was considered since the period captures the returns mainly post SEBI scheme categorization. The data points consider industry peer group average for the different equity categorization except thematic and sector funds, for which CRMF fund data has been considered.

### Who should invest in this fund?

**OBECO Mutual Fund**There is no assurance or guarantee that the investment objective of the scheme will be achieved. Mutual fund investments are subject to market risks, please read scheme related documents carefully before investing.
