Interest Rate Risk			
Relatively Low (Class I)			
Moderate (Class II)			
Relatively High (Class III)		B-III	

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Generating Alpha by capturing Bond-market Volatility

Canara Robeco Dynamic Bond Fund aims to actively manage the interest rate risk of the portfolio. The portfolio of the fund is invested in G-secs and Corporate Debt by identifying mispriced opportunities & capturing volatility trends. The fund aims at generating Alpha through free-style duration management, depending on the interest rate view i.e. in anticipation of interest rates falling, the fund manager endeavors to increase the macaulay duration and when interest rate are expected to increase, minimize it. At the same time it endeavours to capture accruals in the form of portfolio running yields on high-quality debt instruments. This proactive strategy aims to help the fund to benefit from interest rate fluctuations under varying market conditions.

Investment Strategy – Highlights

- **Accrual Strategy** : Endeavour to capture accruals in the form of portfolio running yields on high-quality debt instruments
- **Active Trading Strategy for Government Securities & Corporate Debt** : Endeavour to generate capital gains through Duration calls in G-Secs & Spread trading in Corporate Debt
- **Temporary mispricing due to government borrowing** : Endeavour to capture capital gains by identifying opportunities resulting from Government borrowings like auctions of G-sec and SDLs
