

CANARA ROBECO SHORT DURATION FUND

(Short Duration Fund - An open ended short term debt scheme investing in debt & money market instruments such that the Macaulay duration of the portfolio is between 1 year and 3 years. A moderate interest rate risk and moderate credit risk.

This product is suitable for investors who are seeking*:

- Income / capital appreciation over short term
- Investment in debt & money market instruments such that the Macaulay duration of the portfolio is between 1 year and 3 years

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Credit Risk	Potential Risk Class		
	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Relatively Low (Class I)			
Moderate (Class II)		B-II	
Relatively High (Class III)			

Canara Robeco Short Duration Fund intends to generate returns commensurate with a portfolio predominantly comprising of corporate bonds of short-term maturity, money market instruments and government securities.

A Dynamically managed Short Term Fund:

- Upto 100% of the portfolio would be invested in Debt and Money market instruments with a view to maintain the portfolio Macaulay Duration between 1 year and 3 Years
- The portfolio will be endeavoured to be invested in high credit quality companies thereby minimising the credit risk of the portfolio which is important in the short duration

The fund would present investors with:

- Opportunity to capture currently available accruals in the form of portfolio running yields on high-quality, short-term debt instruments
- A dynamically managed short term portfolio with an active trading strategy through G-Secs and spread contraction on high quality corporate bonds / state development loans.
- Tax efficient returns for investment of more than 3 years

Why Now?

Yields across the yield curve have already risen sharply in the recent past in response to higher inflation prints, volatile crude prices and expected fiscal slippages. However, going ahead the interest rates may not go up much from current levels thereby becoming attractive once again to the investors.

Bond yields for short maturity papers between one and five years continue to remain attractive. High running yield on short to medium term papers is another reason why experts are pushing for this segment now.

Near term volatility increases coherent risks in long duration funds. Thus investors could look at exploring investments for a shorter term till there is certainty about no more rate hikes.

All these augur well for a strategy which focuses on current accruals and active duration management to generate returns as compared to a low credit long duration fund relying on interest rate softening and credit uptake.
