Make the most of the opportunity, invest in Canara Robeco Value Fund.

CANARA ROBECO VALUE FUND

(An open-ended equity scheme following a value investment strategy)

Presenting Canara Robeco Value Fund which invests in businesses that are trading at a price less than their intrinsic values and are expected to realise their true worth in the future. Each stock is handpicked by a team of experts and analysts.

To know more, please contact your Financial Advisor or visit www.canararobeco.com

This product is suitable for investors who are seeking*:

- Long term capital growth
- Investments in equity and equity related instruments by following value investing strategy

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

INTRINSIC VALUE INVESTING – THE CONCEPT

'INTRINSIC VALUE' is a true value of an asset and is the maximum price one is ready to pay to hold the asset forever.

Above explanation is purely meant for concept illustration only.
Images Sources: Investor Trading Academy

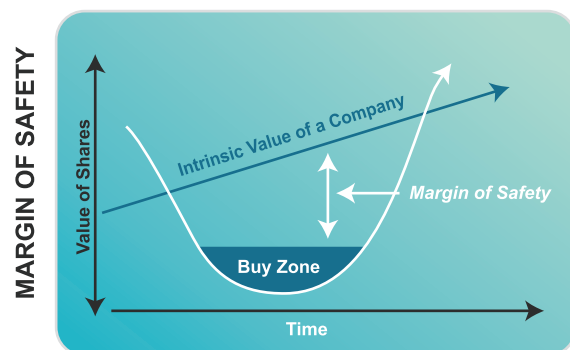

- ▶ Intrinsic Value Investing is a broader philosophy, which involves buying companies at the price lower than their intrinsic value
- ▶ Keeping a margin of safety
- ▶ Taking advantage of market inefficiencies

ESSENCE OF INTRINSIC VALUE INVESTING

Every entity, listed or unlisted, follows a business model and generates cash flow / revenue for its shareholders. Based on this model of operations and the projections of the future cash flow, every company has an '**INTRINSIC VALUE**'. There are many companies in the market whose stock price is not the true indicator of their worth. They are intrinsically more valuable and have a lot of potential to grow. If the company's market value is less than its intrinsic value, then it is considered to have 'value' that may unlock the future.

- ✓ Value investing is an opportunity for investors to benefit from the mispricing opportunities (buy low), to only sell at a later stage, where the valuations revert to the companies' intrinsic value (sell high).
- ✓ An important aspect of intrinsic value investing is to keep an appropriate "MARGIN OF SAFETY" which significantly improves the risk-reward ratio associated with investing in business.

MARGIN OF SAFETY is a principle of investing in which an investor only purchases securities when their market price is significantly below their intrinsic value. Margin of safety incorporates quantitative and qualitative considerations to determine a price target and a safety margin (or cushion) that discounts that target. In value investing, it is important to have a reasonable protection for the investment made i.e. margin of safety. Therefore, higher the margin of safety, lower is the likely risk

Above explanation is purely meant for concept illustration only.

ABOUT CANARA ROBECO VALUE FUND:

Canara Robeco Value Fund is an open-ended equity scheme, which will follow a value investment strategy. The fund intends to take significant exposure into equities and aims to generate long-term capital appreciation from a diversified portfolio in the Indian markets with higher focus on undervalued companies.

The fund tries to find companies which are trading at a discount to their 'Intrinsic Value'.

'Intrinsic Value' strategy would look at overreaction of market participants to the short-term developments in industries/companies and exploit available opportunities for investment returns..

This strategy would also rely on the analytical and behavioural edge to generate investor alpha.

FUND'S PORTFOLIO CREATION APPROACH:

Note: The above is only indicative in nature. There is no assurance or guarantee that the investment objective of the scheme will be achieved. Mutual fund investments are subject to market risks, please read scheme related documents carefully.

MARKET CAPITALIZATION (as on January 31, 2025)
