Economic Indicators

(as on March 31, 2023)

Inflation in India (%)

Consumer Price Index decreased to 6.44% in Feb'23 from 3-month high of 6.52% in Jan'23, mainly due to decrease in prices of vegetables and lowered inflation of other food items. Wholesale Price Index (WPI) cools down to 25 months low, 3.85% in Feb'23 from 4.73% in Jan'23, primarily contributed by fall in the prices of manufactured items and fuel and power. This is the 9th straight month of decline in WPI-based inflation.

Index of Industrial Production (%)

Index of Industrial Production (IIP) rose to 5.2% in Jan'23 from 4.7% in Dec'22 primarily owing to a double digit growth in electricity output and subdued growth in mining and manufacturing. The electricity and mining sectors rose by 12.7% and 8.8% respectively, whereas the manufacturing sector increased by 3.7% in Jan'23.

Indian Business Indicators - Purchasing Managers' Index (PMI)

S&P Global India Manufacturing Purchasing Managers' Index (PMI) grew to 3 months high of 56.4 in Mar'23 from 55.3 in Feb'23 attributed to higher demand resilience and competitive pricing. The sector also benefitted from greater foreign demand for Indian exports with new export orders rising in March. PMI Services declined to 57.8 in Mar'23 from 59.4 in Feb'23 and thereby indicating a slower rate of expansion. Still, the latest reading pointed to the 20th successive month of increase in the service sector as robust foreign demand for India's services, reflected in record services exports. The reading remains in the expansion zone as a print above 50 means expansion while a score below 50 denotes contraction.

USD INR & Brent Crude Movement

Brent crude oil stood at ~US\$ 79.77 despite the supply outstripping still-lacklustre demand, with stocks building to levels not seen in 18 months. Across the world, concerns over turmoil in the international banking sector and rising inflation hit the demand outlook of the commodity. The Rupee closed the month on 82.18 against Greenback as on Mar'23.

Equity Markets - India & US

Bellwether indices, Nifty 50 and S&P BSE Sensex significantly volatility during the month and increased marginally by 0.32% and 0.05% respectively on m-o-m basis majorly due to weak global cues leading to a sell-off in the global equity markets due to significant decline in share price of a prominent private sector bank based in U.S. that mainly funded startups. Domestic retail inflation continuing to remain above the Reserve Bank of India's upper tolerance level of 6% in Feb'23 also added to negative sentiments in the markets. Goods and Services Tax (GST) collection stood at ₹ 1.60 lakh crore in Mar'23, the 2nd highest ever, which is 13% more than the corresponding period of last year. Foreign Institutional Investors (FIIs) were net buyers in Indian equities to the tune of ₹ 7935.51 crores this month. Dow Jones increased by 1.89% from previous month.

Interest Rate Movement (%) - India & US

Yield on the 10-Year benchmark paper decreased slightly, closing at 7.311% on Mar'23 vs 7.433% on Feb'23 following Reserve Bank of India's (RBI) commentary on inflation. Bond yields declined as U.S. Federal Reserve hinted at ending the rate hike cycle soon. 10-year U.S. Treasury bond closed higher at 3.467% on Mar'23 vs 3.92% on Feb'23.

Note : The data/statistics are given to explain general market trends, it should not be construed as any research report/research recommendation. The sector(s) mentioned are for the purpose of understanding only and the Fund may or may not have any future position in these sector(s).

Equity Market Review

Mr. Shridatta Bhandwadar
Head - Equities

Equity Market Update

- ▶ In the month of Mar'23, equity markets remained significantly volatility during the month but ended flattish with Nifty 50 rising marginally by 0.32% m-o-m basis majorly due to weak global cues leading to a sell-off in the global equity markets due to significant decline in share price of a prominent private sector bank based in U.S. that mainly funded startups. Domestic retail inflation continuing to remain above the Reserve Bank of India's upper tolerance level of 6% in Feb'23 also added to negative sentiments in the markets.
- ▶ Foreign Institutional Investors (FIIs) were net buyers in Indian equities to the tune of ₹ 7935.51 crores
- ▶ Goods and Services Tax (GST) collection shows that ₹ 1.60 lakh crore were collected for Mar'23, which is 13% more than the corresponding period of last year. Monthly GST collections for the month of Mar'23 being the second highest of all time, coupled with 22% higher GST collections for FY22-23 over last year point towards the growing trajectory of the Indian economy.
- ▶ Further, uncertainty over aggressive rate hike by the central bank and government hiking securities transaction tax on futures and options contracts also added to the losses. Sentiments were further dampened after the United Nation downgraded its GDP growth forecast for India and warned that higher interest rates contributed to the decline as well.
- ▶ Though at the end of the month, markets were resilient with the help from the financial year-end rally, cooling off global inflationary pressures, and buoyancy in domestic macro indicators. Climate expert also suggest the 2023 monsoon may be normal. Government Data showed that the India's Eight Core Industries growth increased by 6 per cent in Feb'23 as against a growth of 5.9 percent recorded in the year-ago period.
- ▶ Globally, US equity markets went north by 1.89% as there was slowdown in the annual rate of core consumer price growth in U.S. and pending home sales in U.S. increased for the third consecutive month. Asian and European Equity Markets too rose on the back of consumer prices slowing, hope of a slowdown in the pace of monetary policy tightening and upbeat economic data from China made market participants optimistic regarding the recovery of China's economy.

Note: The past performance may or may not be sustained in the future.

Equity Market Outlook

Global environment remains complex with persistent inflation at higher level than expected, persistent supply chain challenges (now oil production cuts by OPEC to keep prices above 85 dollars/bbl) and geopolitical re-alignment and its long-term implications for supply chains, dollar as a global currency and global inflation in this new context. Inflation might have peaked, based on the latest inflation data in US; though not at a level enough for Fed to start getting accommodative. The latest banking crisis could mean Fed might have to slower pace of increase in the interest rates despite inflation. Terminal interest rates in US have clearly moved to 5.5%-5.75% over last 6 months. Combination of slowing growth but yet sticky inflation is an outcome of elevated energy prices and challenged supply chains in China/Energy, which are taking time to correct itself. Geopolitical tensions are taking time to abate and are only getting complex. Given these tensions, supply chains and global trade has become vulnerable to new dimension in 2023, missing till 2022. The banking crisis is being talked by central bankers through regulatory channel without compromising on inflation fight through interest rate increases. This will mean that the developed world will see growth moderation through FY24; though China might see some improvement due to post covid opening-up of economy.

In our worldview, 1) the Liquidity, 2) Growth and 3) Inflation surfaced post monetary and fiscal expansion in CY20-21 in that order and they will reverse in the same order during CY22-23. We have already witnessed liquidity reversal since last few quarters (although was forced to reverse due to banking crisis); growth has started receding lately (Europe is already in recession, US is slowing) and inflation will be the last one to moderate. We have seen an initial downtick in inflation. Inflation is taking more time than usual to recede given healthy household savings, elevated energy prices, tight labor markets and challenged supply chains in China. In-turn, further interest rate increases become imperative - expect additional 25-50bps increase through next 6 months to 5.25%-5.75% in US –and remain there for some time.

Indian macro remains resilient. CAD has improved with falling commodities and slowing growth. Most domestic macro and micro indicators remain steady. The only worrying aspects domestically are latest consumption slowdown and sticky core inflation above 6% level. Given these aspects, the domestic equity market remains focused on earnings. Both key factors, earnings growth and cost of capital (interest rate outlook globally) are neutral to negative for India from near term perspective and thus market will continue to consolidate till we get visibility on earnings upgrades or substantial decline in interest rates (Inflation globally/locally) to change multiples. The internals of the earnings are not very healthy expect in financials, auto and industrials. India trades at premium to other EMs and thankfully that is correcting with the consolidation in market over last 1.5 year. Indian equity market trades at 19x FY24 earnings – with earnings CAGR of 13-14% over FY23-25E – in a fair valuation zone from near term perspective. We will watch out for one year forward (Earnings yield – Gsec yield) gap to compress to ~150bps for getting more constructive in near term. The earnings growth/Valuation expectations context is turning more and more favorable for anyone who has 24-36months view from hereon.

Having said this on near term earnings /market context, we believe that Indian economy is in a structural upcycle which will come to fore as global macroeconomic challenges recede over next few quarters. Our belief on domestic economic up-cycle stems from the fact that the enabling factor are in place viz. 1) Corporate and bank balance sheets are in best possible shape to drive capex and credit respectively, 2) Consumer spending remains resilient through cycle given our demographics, 3) Govt is focused on growth through direct investments in budget as well as through reforms like GST (increasing tax to GDP), lower corporate tax and ease of doing business (attracting private capex), PLIs (private capital through incentives for import substitution or export ecosystem creation) and 4) Accentuated benefits to India due to global supply chain re-alignments due to geopolitics. This makes us very constructive on India equities with 3-5years view.

Debt Market Review

Mr. Avnish Jain
Head - Fixed Income

Macro Review & Fixed Income Market Outlook

Global Economy Update:

Macro Backdrop: Global growth continues to remain stronger than anticipated despite formidable headwinds.

In its Interim Economic Outlook report, released on March 17, 2023, the Organization for Economic Cooperation and Development (OECD) revised up the global growth forecast for 2023 to 2.6 percent from 2.2 percent in November 2022, and for 2024 to 2.9 percent from 2.7 percent.

Inflationary pressures, tight labour markets, and hawkish central bank guidance have fuelled market expectations of higher interest rates for a longer period.

The initial reaction was a rise in sovereign bond yields, a strengthening of the US dollar, and a retreat in global equity markets in February.

The failure of three banks in the United States has unsettled investor sentiments just as markets were pricing in the possibility of further tightening of financial conditions.

This has led to market expectations turning to US FED pivoting to rate easing earlier than expected.

Recession risks are increasing on US regional banking turmoil.

Indian Economic Growth:

Macro Backdrop: Despite high tides of global uncertainty, the impact on Indian economy has remained limited till now.

The National Statistical Office (NSO) released the second advance estimates (SAE) of national income on February 28, 2023, indicating that the recovery from the pandemic was stronger than previously thought, led by private consumption, and supported by a rebound in government consumption during 2021-22.

According to the NSO's data released at the end of February, India's per capita GDP will grow by 14.7% in nominal terms and 5.9% in real terms in 2022-23.

Over the last decade, these growth rates were 9.5% and 4.5%, respectively, resulting in improved livelihoods.

In US dollar terms, India's per capita GDP has surpassed US\$ 2,450, representing a significant step towards becoming a middle-income economy.

Agriculture is in a seasonal uptick, industry is emerging from contraction, and services have maintained momentum.

The increase in export growth, combined with a significant decrease in import growth, reduced the drag from net exports.

Consumer price inflation remains high, and sticky, defying the apparent softening of input costs, probably indicating corporates not passing input cost benefit to consumers

On the supply side, the expansion was broader, led by services and followed by industry.

The GST collections (Centre plus States) grew by 12.4 per cent (y-o-y) in February 2023 to INR 1.49 lakh crore.

Inflation:

Global: Headline inflation eased across most AEs (Advanced Economies) and EMEs (Emerging Market Economies); nonetheless, it remains elevated and well above targets in most economies.

In the US, headline CPI inflation fell to 6.0 percent in February 2023 from 6.4 percent the previous month, in line with market expectations. In January 2023, inflation based on the personal consumption expenditure (PCE) price index increased slightly to 5.4%.

In the Euro area and in the UK, Inflation fell to 8.5% and 10.1% in February and January 2023, respectively.

In Japan, CPI (all items excluding fresh food) inflation reached 4.2% in January 2023, the highest level in four decades.

In most economies, elevated core inflation remains a major concern as it is well above the targets

In February 2023, inflation in Brazil, Russia, Thailand, and China moderated.

Source: Bloomberg and OECD

India: CPI inflation moderated to 6.44 per cent in February 2023 from 6.52 per cent in January, though remains above RBI's comfort band of 6%. The easing of headline inflation by 8 basis points between January and February was driven by a favorable base effect of 24 basis points, which more than offset the positive momentum of 17 basis points.

Trends and Drivers of CPI Inflation:

Notes: CPI inflation for April-May 2021 was computed based on imputed CPI indices for April-May 2020.

Sources: National Statistical Office (NSO) and RBI staff estimates.

Bond Yields & Spreads: US FED hiked rates by 25bps in Mar '23 FOMC (Federal Open Market Committee), following a similar hike in Feb '23, despite banking sector stress, indicating that inflation remains top priority.

ECB hiked by 50bps with the Bank of England (BoE) hiking by 25bps.

In a surprise move, RBI paused in the first policy of FY2024, keeping rates steady at 6.50%.

US 10Y yield dropped sharply in March, falling to 3.47% as contagion fears from the banking stress engulfed global markets.

India rates drifted lower on global cues despite uptick in inflation, though extent of fall was limited. 10Y GSEC traded in 7.30-7.40% range, awaiting RBI policy outcome in April 2023.

Short-term rates drifted lower as liquidity remained good and absence of any government supply supported markets. Further, global rate softening helped positive market sentiment.

Medium to long term corporate spreads remained on lower side in absence of any material increase in supply.

Outlook:

Global: Global economy is likely to be marked by slow growth, moderating but elevated inflation, peaking policy rates, and continuing geo-political risks.

Recent spate of bank failures in the US and takeover of Credit Suisse by UBS has added to global angst.

Inflation seems to have peaked in major countries, though reasons to cheer may still be far away.

Recent inflation prints point to pace of fall moderating and pushing global central banks to continue hawkish stance.

The sharp rise in rates by the US FED and other central banks points to extraordinary steps needed to tame decades high inflation.

With inflation mandates of 2% in most AEs (Advanced Economies), the current inflation is still very high. AE banks are likely to remain inflation focused though the evolving banking crisis is likely to complicate policy making in 2023.

While rate hikes in major countries may end soon, rates may have to remain higher for longer to bring down inflation to mandated levels.

India: In India, macro situation is better. Growth while remaining resilient is likely to slow down to below 6% in FY2024, though RBI is projecting inflation at 6.4% in FY2024.

Inflation continued to remain high in Feb23, printing 6.4%.

Government borrowing plan for FY2024 threw no surprises with government planning to borrow INR 8.8 trillion (about 59% of full year budgeted target).

RBI MPC surprised markets by pausing of rate hikes, citing global financial stability concerns and the need to assess the impact of cumulative tightening already delivered in last 1 year.

RBI MPC did not change stance as well, keeping room for more action if required.

While Governor Das stressed that the pause in hike cycle was only for the current meeting, we believe that the bar for further rate hike is now high, as the US FED is probably veering to the end of cycle as well, in the wake of banking stress in the US.

We now expect RBI MPC to go for a longish pause and watch the evolving inflation dynamics.

India growth remains resilient, keeping pressure on core inflation as well as on RBI MPC, to maintain tight monetary policy.

With RBI projecting inflation to be 5.2% for FY2024, it remains above their 4% medium term policy target, giving them little room for easing action.

Global rate scenario has turned benign in wake of banking stress and contagion risk. If global inflation continues to moderate, as expected, rate easing may start earlier than expected, possibly by end of 2023.

Markets have rallied post policy, with the curve steepening as short-term rates drop more than longer term rates. With RBI likely to remain in pause and volatile global markets, rate markets may trade in a range with a downward bias. We expect 10Y G-SEC to trade in range of 7.10-7.30% in the near term.

CANARA ROBECO FLEXICAP FUND (CRFCF)

(as on March 31, 2023)

This product is suitable for investors who are seeking*:

- Capital appreciation over long term
- Investment in equity and equity related instruments across large cap, mid cap, small cap stocks

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

FUND INFORMATION

CATEGORY/TYPE: Flexi Cap Fund - An open-ended dynamic equity scheme investing across large cap, mid cap, small cap stocks

SCHEME OBJECTIVE: To generate capital appreciation by investing in equity and equity related securities. However, there can be no assurance that the investment objective of the scheme will be realized.

PRODUCT POSITIONING

Canara Robeco Small Cap Fund is an open-ended equity scheme predominantly investing in small cap stocks. It considers companies ranked 251st and onwards in terms of full Market Capitalization as its Investment universe. The fund provides a blend of 'Growth' and 'Value' style of investing. This Fund seeks to invest in high quality small cap business which are undervalued and have a sustainable business. Further, it aims to invest in companies with consistent earnings and reasonable valuations which could lead to Alpha Generation opportunity. Fund intends to invest at least 65% in small-cap companies which have high growth potential and remaining 35% of the portfolio across Large, Mid and Small cap companies after assessing the market conditions.

PRODUCT POSITIONING

Canara Robeco Focused Equity Fund is an open-ended equity scheme which takes a concentrated exposure in not more than 30 high conviction stocks across market capitalisation depending on the growth opportunities. The fund may benefit from the active allocation to the select best ideas with an aim to achieve optimal portfolio diversification across sectors to manage risk. The fund's portfolio focuses on high quality and high growth stocks while remaining market capitalisation agnostic but sensitive to liquidity constraints. Further, the fund strategy intends to have a good combination of 'Leaders' with proven track record across market cycles to provide stability, 'Challengers' with improving market share to provide growth to the portfolio and 'Emerging Themes' or cyclical turnaround beneficiaries.

PRODUCT POSITIONING

Canara Robeco Value Fund is an open-ended equity scheme which follows a value investment strategy. The fund intends to take exposure into equities and aims to generate long-term capital appreciation from a diversified portfolio in the Indian markets with a higher focus on companies which are trading at a discount to their 'Intrinsic Value'. 'Intrinsic Value' strategy relies on the analytical and behavioural edge to generate investor's alpha and keeps an appropriate 'Margin of Safety'. The fund has a market cap agnostic approach following a mix of bottom up and top down strategy and it aims to benefit over the full investment cycle.

PRODUCT POSITIONING

Canara Robeco Mid Cap Fund is an open ended mid cap fund which will aim to invest in companies that are at the confluence of Industry Growth, Company Growth & Management Pedigree. The fund strategy intends to create a good combination whereby the fund identifies "leaders" which showcase superior earnings growth, "compounders" which have high cash flow generation and boast of stable earnings growth and "turnaround beneficiaries" which are companies which benefit from revival in industry cycle.

MANAGING THIS FUND : Since 24-July-19

PRODUCT POSITIONING

Fund predominantly invests in tri-party repos, overnight reverse repos and fixed income securities/instruments with maturity of one (1) business day. Fund has minimal interest rate and credit risk and tends to ensure a high degree of liquidity in the portfolio. Fund offers an alternative to corporate and individual investors who may want to park their idle funds for short period of time and expecting minimal interest rate and credit risk.

BENCHMARK: CRISIL Banking and PSU Debt Index

FUND MANAGER: Mr. Avnish Jain

TOTAL EXPERIENCE: 27 Years

MANAGING THIS FUND: Since 22-August-22

PRODUCT POSITIONING

Canara Robeco Banking and PSU Debt Fund would be an "Actively Managed Fund" that aims to capture opportunities in the interest rate cycle and mispricing on the yield curve.

The Fund will endeavour to invest in "High Grade Assets" that are either government-backed entities or systemically important private banks/entities. This potentially provides lower credit risk.

The fund is suitable for investors who have a "Medium-term investment horizon" of 3-4 years & having relatively "low to medium risk appetite" looking to invest in high credit quality bonds with good liquidity.

* On face value of ₹10. ● For Daily, Weekly & Monthly dividend history of Canara Robeco Liquid Fund, Canara Robeco Ultra Short Term Fund & Canara Robeco Savings Fund

Visit : www.canararobeco.com. ● The dividend amount is before tax calculation.

Past performance may or may not be sustained in the future. Pursuant to payment of dividend, the NAV of the IDCW option of the scheme would fall to the extent of payout and statutory levy (if applicable).

HOW TO READ A FACTSHEET

Fund Manager : An employee of the asset management company who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Minimum Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until Maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Entry Load : A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the exit load is 1%, the investor will enter the fund at Rs. 101.

Exit Load : Exit load is charged at the time an investor redeems the units of mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceeds at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1% the investor will receive Rs. 99

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation : Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio : The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to recent / updated cumulative market value of investments of a scheme managed by the mutual fund.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

DEFINITIONS

(as on March 31, 2023)

Total Expense Ratio : Expressed as an annualized percentage, it is the ratio of all the expenses of the fund to the total assets of the fund and includes the fund management fees paid to the asset management company for managing the fund's assets.

Sharp Ratio : The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta Ratio : Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

Portfolio Turnover Ratio : It is a measure of how often assets within a fund are churned.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Average Maturity : It is the weighted average of residual maturity of debt securities in a fund portfolio

Portfolio Yield : Weighted Average valuation yield of the assets

Standard Deviation : Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Risk Free Return : It represents the rate of return an investor could have earned by investing in a security which is believed to have zero investment risk over the specified period of time.

Tracking Error : Tracking error is a measure of how closely is a scheme able to imitate the index to which it is benchmarked. It is the standard deviation of the difference between the scheme and index returns.

R-Squared : It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.

TRI : Total Return Index (TRI) is an index that measures the performance of a group of components by assuming that all cash distributions are reinvested, in addition to tracking the components' price movement. It takes into account all dividends/ interest payments that are generated from the basket of constituents that make up the index in addition to the capital gains and considered as an appropriate measure of performance.
