DEFINITION / DISCLAIMERS

DEFINITIONS / DISCLAIMERS	51
---------------------------------	----

Inflation in India (%)

Consumer Price Index hits nine-month high to 5.49% in Sept'24 from 3.65% in Aug'24 largely on account of an uptick in food inflation, high base effect and adverse weather conditions. While prices of cereals, meat and fish, eggs, and pulses fell in September, prices of milk and milk products, fruits, and vegetables rose during the month. Though, retail inflation is below the Reserve Bank of India's upper tolerance level of 6%. Wholesale Price Index (WPI) increased to 1.84% in Sept'24 from 1.31% in Aug'24 driven mainly by higher prices in food articles and other manufacturing segment though Fuel and power sector deflated. It stepped out of the deflationary zone for the eleventh time in row.

Indian Business Indicators - Purchasing Managers' Index (PMI)

S&P Global India Manufacturing Purchasing Managers' Index (PMI) increased marginally to 57.9 in Oct'24 from 56.5 in Sep'24, driven by faster growth in total new orders and international sales. Additionally, new export orders showed stronger growth. PMI Services rose slightly to 57.9 in Oct'24 from 57.7 in Sep'24, supported by a strong rise in new work intakes. The reading remains in the expansion zone, as a score above 50 indicates expansion, while a score below 50 denotes contraction.

Equity Markets - India & US

Bellwether indices, Nifty 50 and S&P BSE Sensex decreased drastically during the month by -6.22% and -5.83% respectively following a result of a widespread sell-off in all sectors as investors' desire for riskier assets was tempered by worries of a war between Iran and Israel. Continuous foreign fund outflows and rise in global crude oil prices on supply uncertainty amid escalating tensions in the Middle East due to the conflict also added to fall. Anxiety over the next U.S. election also contributed to the cautious undertone that predominated. However, during the month, sentiment was boosted after the RBI in its latest monetary policy meeting shifted its stance from 'withdrawal of accommodation' to 'neutral'. Foreign Institutional Investors (FIIs) were net sellers in Indian equities to the tune of ₹ 94,016.92 crore. Gross goods and services tax (GST) collections in Oct'24 stood at Rs. 1.87 trillion, the second highest collection so far since the time it was introduced, representing a 8.9% rise on a yearly basis and this points towards the growing trajectory of the Indian economy. Dow Jones decreased by 1.34% from previous month.

Note : The data/statistics are given to explain general market trends, it should not be construed as any research report/research recommendation. The sector(s) mentioned are for the purpose of understanding only and the Fund may or may not have any future position in these sector(s).

Source: Bloomberg

Index of Industrial Production (%)

Index of Industrial Production (IIP) decelerated to -0.1% in Aug'24 from 4.8% in Jul'24. The slowdown was primarily due to an unfavourable base and a contraction in the mining and electricity sectors due to excess rains. The three major components of IIP, including mining, manufacturing and electricity, witnessed a contraction of 4.2 per cent, growth of 1 per cent and contraction of 3.7 per cent, respectively. A decline in output was observed in 11 out of the 23 manufacturing subcategories.

USD INR & Brent Crude Movement

Brent crude oil increased to US\$ 73.16 on Oct'24 end from US\$ 71.77 on Sep'24 end on expectations of higher demand for fuel and because of concerns that a wider Middle East conflict could disrupt global energy shipments. The Rupee closed the month on 84.0837 against Greenback as on Oct'24.

Interest Rate Movement (%) - India & US

Yield on the 10-Year benchmark paper remained range-bound, closing at 6.85% on Oct'24 vs 6.75% on Sep'24 following rise in U.S. Treasury yields and crude oil prices over an escalating conflict in the Middle East following Iran's missile strikes on Israel. US 10 year G-Sec closed lower at 4.2844% on Oct'24 vs 3.7809% on Sep'24.

Equity Market Review

Mr. Shridatta Bhandwadar
Head - Equities

Equity Market Update

- ▶ In the month of Oct'24, Nifty 50 went south by -6.22% following a result of a widespread sell-off in all sectors as investors' desire for riskier assets was tempered by worries of a war between Iran and Israel. Continuous foreign fund outflows and rise in global crude oil prices on supply uncertainty amid escalating tensions in the Middle East due to the conflict also added to fall. Anxiety over the next U.S. election also contributed to the cautious undertone that predominated.
- ▶ Foreign Institutional Investors (FIIs) were net sellers in Indian equities to the tune of ₹ 94,016.92 crore.
- ▶ Gross Goods and Services Tax (GST) collections in Oct'24 stood at Rs. 1.87 trillion, the second highest collection so far since the time it was introduced, representing a 8.9% rise on a yearly basis and this points towards the growing trajectory of the Indian economy.
- ▶ The combined Index of Eight Core Industries increased by 2.0% YoY in Sep'24 as compared to 9.5% growth in Sep'23. Cement witnessed the highest rate of growth with 7.1% followed by Refinery products with 5.8% growth, while Crude oil fell the most by 3.9%.
- ▶ However, during the month, sentiment was boosted after the RBI in its latest monetary policy meeting shifted its stance from 'withdrawal of accommodation' to 'neutral'. Equity market sustained a bit due to the infusion of retail investors and the strength of India's economic growth.
- ▶ Globally, U.S. equities markets decreased due to weak earning numbers from major tech companies and on expectations that the U.S. Federal Reserve will reduce interest rates at a slower pace than desired. European equities markets experienced a decline as investors responded to a range of regional economic indicators, the U.K. budget, and company earnings updates, as well as closely observing U.S. economic data and keeping an eye on geopolitical developments. Asian markets too declined due to ongoing tensions in the Middle East. In Japan, policy uncertainties loomed over the market after the ruling Liberal Democratic Party lost its parliamentary majority in the recent election.

Note: The past performance may or may not be sustained in the future.

Equity Market Outlook

The global macro environment just turned even more complex with latest US unemployment and growth data being resilient than estimated. Inflation and other data points indicating that inflation while cooling on headline, the core Personal Consumption Expenditures (PCE) is not receding incrementally – pushing back aggressive rate cut hopes. This led to US 10-year rallying from 3.7% to 4.3% as we write this outlook. The dollar index continued to strengthen because of Republican Party's victory in the upcoming election, a negative for all Emerging Market (EM) capital flows in the near term. All EM's, except China witnessed capital outflow during October. Geopolitics in the middle east, Ukraine-Russia (and now even N-S Korea) is clearly on an escalator path, adverse for growth and energy prices both. These are all significant events and pose a risk to a low volatility market that has existed for a few years now, both globally and locally. The US growth is stabilizing at lower levels (but resilient) as the fiscal and monetary impulse is receding, employment data moderating and inflation is moderating gradually – although not as much as was expected lately. The latest PCE in the US is running at 2.1% now. This is leading to a possible goldilocks scenario where you might get lower inflation without hurting growth too much. We expect another 25bps cut before Dec 2024 and another 100-125bps in CY25. Europe is gradually stabilizing at lower levels (but manufacturing continues to suffer), as inflation and interest rates peak in most economies in the Euro area. China continues to have challenges on growth revival due to ageing population and leverage in households/Real estate, which are structural in our view. China reacted to this vicious cycle by giving sizable stimulus, leading to market moving up significantly (>15% over last 3 months). While this creates possibilities of commodities going up in near term, commodities in general may remain muted for extended period, given >30-40% of every commodity is consumed by China and this stimulus doesn't change structural challenges of China in our assessment.

Geopolitical tensions are taking time to abate and are only getting complex. Given these tensions, supply chains and global trade have become vulnerable to new dimension now, missing till pre-covid. India remains one of the differentiated markets in terms of growth and earnings. In our worldview, 1) the Liquidity, 2) Growth and 3) Inflation surfaced post monetary and fiscal expansion in CY20-21 in that order and they will reverse in the same order during CY23-24. We have seen an initial downtick in inflation, which will accelerate in our view over the next few quarters. We expect 100-150bps of interest rate cuts over the next 12 months now.

Indian macro remains best among large markets. Political stability looks almost given. Current Account Deficit has improved significantly and is expected to be ~1% for FY25. Most domestic macro and micro indicators remain steady. Given these aspects, the domestic equity market remains focused on earnings. Earnings growth (13-15% earnings CAGR FY24-26E) remains relatively far better than most Emerging Markets/ Developed Markets. While the earnings are not getting upgraded significantly yet; they are resilient and seems to be bottoming. Financials, Auto, industrials, Telecom, Hospital and Real Estate are witnessing a healthy earnings cycle whereas FMCG, chemicals and IT continue to face headwinds. Indian equity market trades at 20FY26 earnings – in a fair valuation zone from medium term perspective – given longevity of earnings cycle in India. The broader market has moved up >35% in last 1 year – capturing near term earnings valuation positives for FY25/26E. Expect a rollover return as the earnings rollover to FY27. Given the upfronting of returns in mid and small caps (aided by very strong flows also), valuations are at 20-30% premium to past; we are more constructive on large cap from FY25/26 perspective. Domestic cyclicals continue to have earnings edge over global cyclical and consumption. Select financials, select auto, Real Estate, Cement, Industrials, Power, Hotels/Hospitals/Aviation on domestic side continue to display healthy earnings.

Having said this on near term earnings /market context, we believe that Indian economy is in a structural upcycle which will come to fore as global macroeconomic challenges recede over next few quarters. Our belief on domestic economic up-cycle stems from the fact that the enabling factor are in place viz. 1) Corporate and bank balance sheets are in best possible shape to drive capex and credit respectively, 2) Consumer spending remains resilient through cycle given our demographics, 3) Govt is focused on growth through direct investments in budget as well as through reforms like GST(increasing tax to GDP), lower corporate tax and ease of doing business (attracting private capex), PLIs(private capital through incentives for import substitution or export ecosystem creation) and 4) Accentuated benefits to India due to global supply chain re-alignments due to geopolitics. This makes us very constructive on India equities with 3-years view. We believe that India is in a business cycle / credit growth / earnings cycle through FY24-27E – indicating a healthy earnings cycle from medium term perspective.

Head - Fixed Income

Macro Review & Fixed Income Market Outlook

Global Economy Update:

Macro Backdrop:

- ▶ The global economy has exhibited resilience in the midst of heightened geopolitical uncertainty.
- ▶ As inflation continued to ease towards targets in most AEs (Advanced Economies), several central banks have embarked on the path of policy easing.
- ▶ Global financial conditions are easing from restrictive levels, with financial markets continuing to front run central banks in their expectations of policy rate reductions.
- ▶ The S&P Global US Manufacturing PMI rose to 48.5 in October from 47.3 in September but remained below the 50.0 threshold, indicating continued contraction. This marks the fourth consecutive month of PMI below 50, though conditions deteriorated at the slowest rate since July.
- ▶ New orders decreased for the fourth straight month, with uncertainty around the Presidential Election cited as a factor. However, the pace of decline slowed, and production contracted only slightly, marking the weakest decrease in three months.
- ▶ Employment in manufacturing fell modestly for the third consecutive month, and purchasing activity dropped at its steepest rate since June 2023 as firms cut inventories amid weaker demand and supply delays.
- ▶ The S&P Global US Services PMI edged up slightly to 55.3 in October 2024 from 55.2 in September, surpassing market expectations of 55.
- ▶ The HCOB Eurozone Manufacturing PMI rose to 45.9 in October 2024, reaching a five-month high from 45.0 in September and exceeding expectations of 45.3. Despite this improvement, manufacturing output continued to decline for the 19th month, though at a slower pace.
- ▶ The HCOB Eurozone Services PMI dropped slightly to 51.2 in October 2024, missing the expected rise to 51.5 and marking the weakest growth in services since February. Employment in services nearly stalled, while input costs rose sharply, prompting firms to increase their prices.

Indian Economic Growth:

Macro Backdrop:

- ▶ The outlook for domestic economic activity remains neutral as earnings season have been a bit of disappointment but RBI is confident of India's growth story
- ▶ The revival of private consumption is buoyed by receding inflation and pick-up in rural demand is expected to be its mainstay.
- ▶ The Government's capex push on infrastructure, upturn in investment activity, improved prospects of agricultural sector, strong corporate and bank balance sheets and improved outlook of global growth and trade are further aiding the growth momentum.
- ▶ India's manufacturing sector saw improved performance in October, with the HSBC Manufacturing PMI rising from 56.5 in September to 57.5, driven by accelerated output and new orders, both domestic and international.
- ▶ India's services sector expanded for the 39th consecutive month in October 2024, with the Services PMI rising slightly to 57.9. New business inflows drove a surge in employment, reaching the highest growth in 18.5 years, across both full-time and part-time roles. Export sales also improved, while rising capacity pressures led to the fastest backlog growth since May.
- ▶ India's total exports during April-September 2024 are estimated at USD 393.22 Billion registering a positive growth of 4.86 percent.
- ▶ Total imports during April-September 2024 are estimated at USD 448.05 Billion registering a growth of 6.89 percent.
- ▶ October GST collection surpasses ₹ 1.87 lakh crore, with 9% YoY growth driven by higher domestic transactions and imports.

Inflation:

Global:

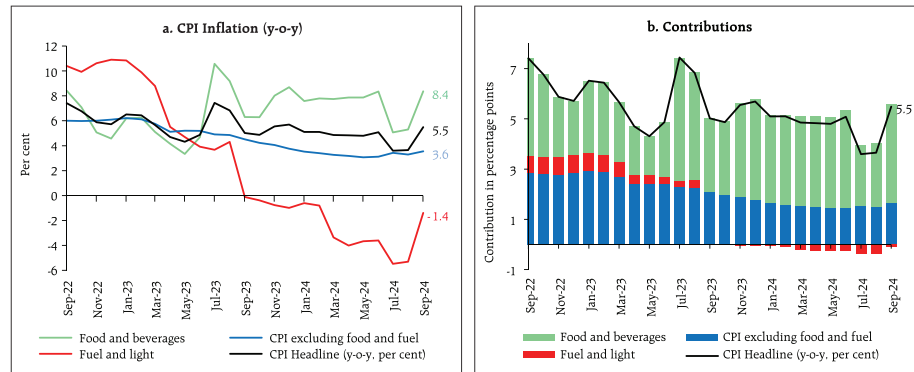

- ▶ Inflation continued to moderate across major economies, albeit unevenly.
- ▶ In the US, consumer price index (CPI) inflation eased to 2.4 per cent (y-o-y) in September from 2.5 per cent in August.
- ▶ Headline inflation in the Euro area and the UK decelerated to 1.8 per cent and 1.7 per cent, respectively, in September.
- ▶ Inflation in Japan (CPI excluding fresh food) softened to 2.4 per cent in September.
- ▶ Among EMEs, inflation increased in Brazil in September but softened in Russia and China in September.
- ▶ Core and services inflation trended downwards in most AEs; however, it remained higher than the headline.
- ▶ Among AE central banks, Euro area, South Korea and Iceland cut their policy rates by 25 bps while New Zealand cut its benchmark rate by 50 bps in October.
- ▶ Sweden, Switzerland and Czech Republic lowered their benchmark rates by 25 bps each in their September meetings.
- ▶ Australia, however, continued to hold its policy rate unchanged in September.

India:

- ▶ CPI inflation increased to a nine-month high of 5.5 per cent in September 2024 from 3.7 per cent in August 2024.
- ▶ The sharp increase in inflation of 1.75 percentage points came from a positive momentum of 60 bps and an unfavourable base effect of 115 bps which was compounded by a resurgence in food price momentum.
- ▶ Food inflation increased y-o-y to 8.4 per cent in September from 5.3 per cent in August, driven up by a positive momentum and an unfavourable base effect.
- ▶ Core inflation firmed up to 3.6 per cent in September from 3.3 per cent in August.
- ▶ In terms of regional distribution, inflation hardened in both rural and urban areas in September, with rural inflation at 5.9 per cent being higher than urban inflation at 5.0 per cent.
- ▶ Majority of the states registered inflation close to 6 per cent.

continued....

Trends and Drivers of CPI Inflation:

Source: National Statistical Office (NSO); and RBI staff estimates

Bond Yields & Spreads:

- ▶ Indian yields trended lower in September 2024 on global cues as US FED cut rates by more than expected 50bps.
- ▶ India 10Y benchmark traded lower mimicking lower US rates. The 10Y yield fell to a low of around 6.70% before closing the month at 6.75%.
- ▶ Passive flows continue to support markets.
- ▶ Post a jumbo rate cut by US FED, markets are pricing in another 50bps of easing in 2024.
- ▶ The US FOMC (Federal Open Market Committee) has a median forecast of further 50bps cut in 2024.
- ▶ RBI expected to look for further data cues before they meet in December 2024 as they have changed stance in October Monetary Policy (MPC) meet.
- ▶ Governor of Reserve Bank of India reiterated commitment to the 4% inflation target on a durable basis and expecting that RBI is within distance for rate cuts
- ▶ Liquidity moved both ways with RBI dynamically managed liquidity mismatches through variable repo rate (VRR) auctions and variable reverse repo rate (VRRR) auctions.
- ▶ Bond yield curve softened with flattening bias as long-term yields fell on US rate easing.
- ▶ Corporate bonds moved in tandem with sovereign with overall yields softening across the curve.

Outlook:

- ▶ US FED rate cut has turned market sentiments positive as participants look forward to RBI action as they have changed stance to neutral in October MPC. The change in stance would pave for the rate cuts to start in Indian market.
- ▶ The next market movement will largely hinge on the outcome of the U.S. election, as both candidates have significantly different approaches to guiding the country, with substantial policy implications for the rest of the world.
- ▶ With markets pricing further rate cuts from US FED in 2024, it is likely that RBI may ease rates in December 2024 policy but will largely hinge on US election outcome.
- ▶ FII flows continued to remain strong post inclusion in JP Morgan EM Bond Index since June 2024. Overall CYTD, FIIs have invested over USD 16.75 billion in debt.
- ▶ The influx of foreign funds is anticipated to be liquidity-positive, further contributing to the positive sentiment surrounding bonds.
- ▶ Looking ahead to the medium and long term, the effect on bonds is expected to be positive due to inclusion in JP Morgan Bond Index, as the demand for Government Securities (G-Sec) is likely to drive yields downward.
- ▶ Coupled with further rate moves from the US FED, we believe that RBI may deliver first rate easing by Dec 24 or at least start the narrative of cut in Feb policy.
- ▶ We are structurally long on India as growth inflation dynamics still favourable for yields to tick down as RBI would look for further cues.
- ▶ We anticipate that over the next few months, 10-year yields may trade in 6.60–6.85% range.

PRODUCT POSITIONING

Canara Robeco Focused Equity Fund is an open-ended equity scheme which takes a concentrated exposure in not more than 30 high conviction stocks across market capitalisation depending on the growth opportunities. The fund may benefit from the active allocation to the select best ideas with an aim to achieve optimal portfolio diversification across sectors to manage risk. The fund's portfolio focuses on high quality and high growth stocks while remaining market capitalisation agnostic but sensitive to liquidity constraints. Further, the fund strategy intends to have a good combination of 'Leaders' with proven track record across market cycles to provide stability, 'Challengers' with improving market share to provide growth to the portfolio and 'Emerging Themes' or cyclical turnaround beneficiaries.

PRODUCT POSITIONING

Canara Robeco Value Fund is an open-ended equity scheme which follows a value investment strategy. The fund intends to take exposure into equities and aims to generate long-term capital appreciation from a diversified portfolio in the Indian markets with a higher focus on companies which are trading at a discount to their 'Intrinsic Value'. 'Intrinsic Value' strategy relies on the analytical and behavioural edge to generate investor's alpha and keeps an appropriate 'Margin of Safety'. The fund has a market cap agnostic approach following a mix of bottom up and top down strategy and it aims to benefit over the full investment cycle.

BENCHMARK: CRISIL Liquid Overnight Index

FUND MANAGER : Ms. Suman Prasad

TOTAL EXPERIENCE : 24Years

MANAGING THIS FUND : Since 24-July-19

PRODUCT POSITIONING

Fund predominantly invests in tri-party repos, overnight reverse repos and fixed income securities/instruments with maturity of one (1) business day. Fund has minimal interest rate and credit risk and tends to ensure a high degree of liquidity in the portfolio. Fund offers an alternative to corporate and individual investors who may want to park their idle funds for short period of time and expecting minimal interest rate and credit risk.

FUND MANAGER: 1) Ms. Suman Prasad
2) Mr. Avnish Jain

TOTAL EXPERIENCE: 1) 24 Years
2) 27 Years

MANAGING THIS FUND: 1) Since 16-Sept.-24
2) Since 22-August-22

PRODUCT POSITIONING

Canara Robeco Banking and PSU Debt Fund would be an "Actively Managed Fund" that aims to capture opportunities in the interest rate cycle and mispricing on the yield curve.

The Fund will endeavour to invest in "High Grade Assets" that are either government –backed entities or systemically important private banks/entities. This potentially provides lower credit risk.

The fund is suitable for investors who have a "Medium-term investment horizon" of 3-4 years & having relatively "low to medium risk appetite" looking to invest in high credit quality bonds with good liquidity.

PRODUCT POSITIONING

Canara Robeco Balanced Advantage Fund aims to generating long term capital appreciation by managing equity and debt allocations dynamically. The Fund aims for steady growth, especially during market ups and downs making it more suitable for investors as it takes away the burden of readjusting asset allocation between equity & debt. The fund invests in a careful blend of select stocks and debt securities and it uses an in-house allocation model seeking to limit the downside risk during a falling market and aiming to capture reasonable growth in a rising market.

- Past performance may or may not be sustained in the future.
- : Corresponding Benchmark values not available
- N.A.- Not Applicable because scheme is in existence for less than 1 year or 3 years respectively.
- *Since inception return for the benchmark is Composite return - "As TRI data is not available since inception of the scheme, benchmark performance is calculated using composite CAGR of BSE 500 TRI Index. PRI values from 16th Sept 2003 to 1st Aug, 2006 and TRI values since 1st Aug, 2006 are considered.
- **Scheme has been in existence for more than six months but less than one year, therefore returns shown above are based on simple annualized growth rate of the scheme for the past 6 months and since inception.

HOW TO READ A FACTSHEET

Fund Manager

An employee of the asset management company who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Minimum Application Amount for Fresh Subscription

This is the minimum investment amount for a new investor in a mutual fund scheme

Application Amount for Fresh Subscription

This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount

This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until Maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10 –Year Gsec.

Entry Load

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the exit load is 1%, the investor will enter the fund at Rs. 101.

Exit Load

Exit load is charged at the time an investor redeems the units of mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1% the investor will receive Rs. 99

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit changes in yield.

Standard Deviation

Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit or risk.

Beta

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM

AUM or assets under management refers to recent / updated cumulative market value of investments of a scheme managed by the mutual fund.

Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

DEFINITIONS

(as on October 31, 2024)

Total Expense Ratio

Expressed as an annualized percentage, it is the ratio of all the expenses of the fund to the total assets of the fund and includes the fund management fees paid to the asset management company for managing the fund's assets.

Sharp Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta Ratio

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

Portfolio Turnover Ratio

It is a measure of how often assets within a fund are churned.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Average Maturity

It is the weighted average of residual maturity of debt securities in a fund portfolio

Portfolio Yield

Weighted Average valuation yield of the assets

Standard Deviation

Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Risk Free Return

It represents the rate of return an investor could have earned by investing in a security which is believed to have zero investment risk over the specified period of time.

Tracking Error

Tracking error is a measure of how closely is a scheme able to imitate the index to which it is benchmarked. It is the standard deviation of the difference between the scheme and index returns.

R-Squared

It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.

TRI

Total Return Index (TRI) is an index that measures the performance of a group of components by assuming that all cash distributions are reinvested, in addition to tracking the components' price movement. It takes into account all dividends/ interest payments that are generated from the basket of constituents that make up the index in addition to the capital gains and considered as an appropriate measure of performance.
