The treatment of accrued interest and future accrual of interest, in case of money market and debt securities classified as below investment grade or default, is detailed below:

- The indicative haircut that has been applied to the principal should be applied to any accrued interest.
- In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal.
- In case of securities classified as default, no further interest accrual shall be made.

The following shall be the treatment of how any future recovery should be accounted for in terms of principal or interest:

- Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.
- Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

**Change in Fundamental Attribute of Canara Robeco Equity Diversified Fund**

Dear Investor,

We would like to take this opportunity to express our sincere gratitude for your continued patronage with Canara Robeco Mutual Fund. It is our constant endeavor to add value to your investments and enrich your investment experience with us.

Canara Robeco Equity Diversified Fund is an open-ended multi-cap equity fund investing across large cap, mid cap, small cap stocks. Fund focuses on fundamentally sound companies which are likely to deliver capital appreciation over the long-term. Fund is suitable for moderately high-risk taking investors and is benchmarked against S&P BSE 500 TRI Index.

SEBI, on September 11, 2020 vide circular number SEBI/HO/IMD/DF3/CIR/P/2020/172 changed the asset allocation pattern of Multi cap Funds and prescribed to have minimum investment in each of the market cap i.e. large cap, mid cap as well as small cap companies to 25% of the total assets. These changes have to be made effective from February 2021.

Considering the said changes, the risk profile of the said category would increase to a large extent which would impact the existing investors in the Scheme and would also require huge churn in the existing portfolio to comply with the revised guidelines. However, SEBI, on November 06, 2020 vide circular number SEBI/HO/IMD/DF3/CIR/P/2020/228 has introduced a new category of fund viz, 'Flexi cap Fund'. The asset allocation required for this new category of funds is in-line with the existing asset allocation of Canara Robeco Equity Diversified Fund.

To ensure that the existing investors of the Canara Robeco Equity Diversified Fund are not impacted and also the risk profile of the Scheme remains intact, the fundamental attributes of Canara Robeco Equity Diversified Fund have been revised. Therefore, it is proposed to 'recategorize Canara Robeco Equity Diversified Fund from existing Multi cap Category to Flexi cap Category'. The details of the change are as follows:

Currently the SEBI circular pertaining to valuation of securities that are below investment grade is as under:

A money market or debt security shall be classified as "below investment grade" if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as "Default" if the interest and / or principal amount has not been received, on the day such amount was due or when such security has been downgraded to "Default" grade by a CRA. In this respect, Mutual Funds shall promptly inform to the valuation agencies and the CRAs, any instance of non-receipt of payment of interest and / or principal amount (part or full) in any security.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies.

Till such time the valuation agencies compute the valuation of money market and debt securities classified as below investment grade, such securities shall be valued on the basis of indicative haircuts provided by these agencies. These indicative haircuts shall be applied on the date of credit event i.e. migration of the security to sub-investment grade and shall continue till the valuation agencies compute the valuation price of such securities. Further, these haircuts shall be updated and refined, as and when there is availability of material information which impacts the haircuts.

The said traded price shall be considered for valuation till the valuation price is determined by the valuation agencies.

#### Illustration of Segregated Portfolio

##### Portfolio before Credit Event:

Total Portfolio	Regular Plan	Direct Plan
Net Assets (In Rs.)	950	250
No. of Unit	40	20
NAV per Unit (In Rs.)	23.75	12.50

The above portfolio has a security ABC with current market value before the credit event of Rs.200. The same is allocated between the two plans i.e. Regular and Direct plan as follows:

Total Portfolio	Regular Plan	Direct Plan
Net Assets before mark down (including ABC security)	950	250
Market Value of ABC Security	150	50

Credit event occurs in security ABC. On the date of credit event the instrument is downgraded below investment grade or has defaulted and consequently marked down by 50% from Rs. 200 to Rs. 100 (proportionately allocated under the Regular and Direct Plan).

After splitting the Total portfolio into Main portfolio and Segregated portfolio, the impact will be as below:

##### Main Portfolio after segregation:

Total Portfolio	Regular Plan	Direct Plan
Net Assets after segregation (a)	800	200
No. of Unit (b)	40	20
NAV per Unit (In Rs.) (c=a/b)	20.00	10.00

##### Segregated Portfolio:

Total Portfolio	Regular Plan	Direct Plan
Net Assets after segregation* (a)	75	25
No. of Unit (b)	40	20
NAV per Unit (In Rs.) (c=a/b)	1.88	1.25

(\*equivalent of market value of segregated security)

For existing investors, the total portfolio will decline by the amount segregated as mentioned in the table above (i.e. value of main portfolio after segregation). They will be allotted equal number of units in the main portfolio and the segregated portfolio in the same proportion as held by them in the total portfolio. Thereafter, existing investors can redeem from the main based on the prevailing NAV and they will continue to hold units in the segregated portfolio. For any new investor, they will be allotted units only in the main portfolio based on the prevailing NAV. NAV of the segregated portfolio may undergo a change in future depending on any recovery and any applicable haircut.
